Waste Management Services

With the combination of rising waste management and disposal costs and increasingly more stringent legislation, there are strong incentives to reduce waste volumes and find alternatives to traditional landfill disposal.

CRA's Waste Services

As waste consultants, CRA's Waste Services experts assist clients in all aspects of waste management by providing holistic and environmentally sound waste management, waste minimisation, reuse and recycling programmes that result in cost reductions and landfill avoidance. By utilising the services offered by CRA, clients can corporately monitor sustainability goals by tracking all the waste managed and report how much waste was disposed of, recycled, reused, converted to energy, or avoided landfilling altogether. CRA has a proven track record of providing clients with real cost reductions and improving the sustainability of waste treatment and disposal.

CRA offers the following comprehensive waste management services:

- *Process Rightsizing Audits*
- *Baseline/Benchmarking of Waste Volumes and Costs*
- *Waste Characterisation*
- *Source Separation Studies*
- *Waste Minimisation Strategies*
- *Development of Waste Management Procedures*
- *Alternative Technologies*
- *Waste Recovery*
- *Disposal Management*
- *Compliance Audits*
- *Regulatory Consultation*
- *Regulatory Liaison*

- *Waste Classification*
- *By-product Marketing*

CRA is committed to working proactively on behalf of our clients: first, to eliminate, reduce, reuse or recycle wastes; and second, to manage and dispose of the residual wastes in an efficient, safe, and cost-effective manner.

CRA also offers the following related services:

- *Environmental Permitting*
- *Renewable Energy Solutions*
- *Environmental, Health & Safety Training*
- *Asbestos Management*
- *Environmental Management Systems*
