

## Asbestos Services

The Control of Asbestos Regulations (2006) place a legal duty on the 'duty holder' (the person responsible for the building maintenance, landlord, a facilities manager or a building manager, etc.) of all non-domestic premises and common areas of domestic premises to identify, manage, monitor, and maintain asbestos containing materials (ACM) in their buildings in a safe condition and to have an updated asbestos registry and management plan in place.

Whether you require an asbestos survey or management plan to fulfil your legal 'duty to manage' or you need a full pre-demolition / major refurbishment asbestos survey, CRA can provide a pragmatic and cost-effective solution.

Our experienced surveyors can undertake stand-alone Type I or Type II identification surveys and/or assist you with asbestos management on your premises. CRA can also undertake small to large Type III surveys (pre-demolition or major refurbishment surveys). A Type III survey involves a full sampling programme, including destructive sampling of materials. The survey allows an accurate assessment of the type and extent of ACM requiring removal and disposal prior to demolition.

CRA has extensive experience in conducting asbestos surveys on a variety of sites, from domestic premises to large commercial and industrial sites. CRA personnel are accredited by the BOHS (British Occupational Hygiene Society) P402 – Building Surveys and Bulk Sampling for Asbestos. All surveys are carried out to HSE (Health and Safety Executive) MDHS (Methods for the Determination of Hazardous Substances) and BOHS standards. All samples are sent to an independent, UKAS accredited laboratory for analysis. CRA personnel are also certified in BOHS P404 – Air Sampling and Clearance Testing of Asbestos.

### CRA's Asbestos Services:

- Type I, II, and III ACM surveys
- Full Survey report preparation (including asbestos location, type, extent, condition, surface treatment, floor plans and photographs, assessment and recommended actions)
- Risk assessment
- Asbestos register preparation and updating
- Asbestos management plan and monitoring
- Asbestos awareness training

- Abatement advice (no action, encapsulation, or removal)
- Guidance on safe handling, removal, disposal, and waste management
- Production of work specifications, impartial pre-tender assessment, procurement, and site management
- Site clearance and re-occupation certification
- Site validation and waste handling assistance for asbestos-contaminated land

### Company Background

**Conestoga-Rovers & Associates (Europe) Ltd (CRA)** is an independent full-service environmental consulting firm that provides specialist services in Industrial Operations Support, and Property, Land, and Environmental Management. The CRA team consists of highly qualified personnel experienced in environmental permitting, impact assessments, process design, environmental engineering, and sustainable manufacturing.
